About BRP

More than 40 years of enhancing the relationships between people and their environments confirm that our focus is precisely where it should be: on our clients, their customers and patrons. Since our founding in 1978, we've broadened our services and enhanced our expertise in architecture, project management, planning and development. Today, you can see the results of our influence in more and more cities all over the United States, as well as in our hometown of Springfield, Missouri.

From the onset of preliminary design through construction administration, BRP offers you the confidence of working with professionals focused on projects just like yours.

We've completed more types of projects than many firms. This diversity brings us fresh and new perspectives for our clients and creative solutions that may not have been immediately envisioned.

SERVICE

At BRP, we believe that service is more than an attitude. To us, service is backed by action with positive results. We strive to provide great customer service and take pride in our ability to consistently deliver projects exceeding our client's expectations. We believe that service means rolling up your sleeves, getting in the trenches and doing more than just the basics.

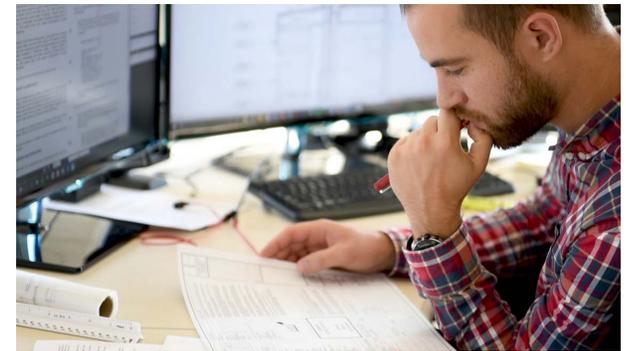

CLIENT FOCUS

We excel at knowing our clients and looking at their projects from all angles. Our team members immerse themselves in all phases of planning, design and construction. We help our clients resolve feasibility and use issues. We can also guide them through franchise processes, entitlement, permitting and many other issues that may arise during the project.

When a client needs a service that falls outside our areas of expertise, we partner with only the best consultants. As consultants, they answer to our standards of quality assurance and client satisfaction.

Our goal is to be the standard against which others are judged for excellence, integrity and leadership in providing professional design services.

DESIGN

Great design is a commitment to high standards and requires balance among quality, economy and scope. Achieving this balance involves simple solutions based on intelligent ideas. Our design approach embraces trust and integrity. By presenting multiple design solutions and openly evaluating each alternative with our clients, we build a relationship that leads to consensus for the best design solution.
